## Customer Reviews

Reinforce the Common Core State Standards all year long in only 10 minutes a day! Common Core Math 4 Today: Daily Skill Practice provides the perfect standards-based activities for each day of the week. Review essential skills during a four day period and assess on the fifth day for easy progress monitoring.

Erin McCarthy has written a number of books on elementary education.

Great book! Kids do a page each day and it has really helped them do better in math. My son got

awarded for excellence in math this month!!!

I am so excited to use this in my classroom. I love how the students are given problems every day of the week. I can check to see my students are understanding the concepts needed for third grade. These will help me ensure my students are prepared for third grade.

I love this book. Everyday practice reviewing concepts learned through the year. I just wish there were more room on each question for the kid to resolve the question but content is good

I'm using this to keep my grandson's math skills from falling behind over the summer months. Math isn't his strong subject and he doesn't care for it at all. This provides some quick, fairly painless, exercises to keep him on track.

We ordered this book for supplemental math work for our 2nd grader. We like the way it progresses throughout the book. It is designed very well. If you are looking for more challenging work, I would recommend maybe going up a grade level. Some of the work is a bit easy. Overall very nice workbook.

MY CHILD UNDERSTANDS MATH BETTER SINCE WE HAVE BEEN USING THIS BOOK AS A STUDY GUIDE. HE HAS WENT FROM F'S TO A'S IN HIS MATH COURSE. I AM VERY PLEASED AND RECOMMEND USING THIS BOOK AS A STUDY TOOL. MATERIAL SIMILAR TO WHATS BEING TAUGHT IN CLASS SETTING.

Does not match up well to what is currently being taught as Common Core, however, it is still a resource.

This is very clear workbook that my son doesn't struggle too much with. It appears that this series (I also own the language arts book) likes to ask vague questions in which a multitude of responses from a 7 year old can exist whereas the answer key does not allow for varied responses.
