Book slow in arriving but in like-new condition. Nice resource to have if your child is currently taking biology or if your school does not give each child a textbook.

Good price for needed textbook.

Arrived in excellent condition. Still used in my kid's school so wanted a home copy.

Great book!!

I like it.

Our school doesn't have enough books for students to take home, only classroom copies. So it has improved my son's grades having his own copy to keep at home.

The Biology book came in perfect condition and quickly. My daughter now has her own copy for home use. Her school did not have enough for all the students, and are for class use only. Other reviewers do not like the textbook, but this is the one that our school is using, and I'm happy that I could get a copy for my daughter.

This book was in great condition and shipped very quickly. My son likes the fact that he doesn't have to carry the school textbook back and forth every day. It was well worth the money to have our own copy at home.
