"Dillard's sections on protection, working with spirit guides and angels, and moving beyond one's nascent style are both reassuring for those just beginning to explore their intuitive selves and substantive to those who have already accepted this preternatural aspect of experience." ---Library Journal --This text refers to the Audio CD edition.

A really great book for people starting to look for their psychic type. It does a great job of explaining the different types (Yes, there are MANY) and guiding you in the right direction! I would highly recommend to people starting to tap into their psychic potential. Seasoned people in the psychic world may find it redundant. I would still recommend it to anyone in the psychic world to have it in their library!

This book is well written as the author has first hand experience into this world of Intuition and is not using other people's work but her own. She gives readings and classes and knows what she is talking about. It is good to find a book that talks about the different types of Intuition and she gives a fascinating questionnaire to fill out to find out what type you are and then explains the differences. There are meditations for the different types and I found the book most enlightening after many years of thinking and wondering about this psychic world. We all have the ability to do this type of work and the author is very positive about using what we know and expanding on it. It was most encouraging to read this book as I know that I have had many things happen or I have made decisions that worked out well and now I know why and am quite excited about the truth of what is really available to us all if we just open our minds to the possibilities that this author explains.

great if you need a label for yourself I found that after I took the test inside I was within 4 points of each and after giving the test to co worker who had a very definite strong point realized that I might be much different from most.

I am so glad that I took a chance and purchased this book! I've always had a fascination with the

paranormal and anything dealing with spirituality. Now, Looking back I never "felt" like I may have been psychic but I had quite a few experiences that I either couldn't explain or just kinda left me wondering. I've always had a knack for picking up on others feeling or having perfect strangers open up to me. Heck I remember at 15 my boss always use to give me the irate customers because I somehow had a way of calming them down (looking back that may not have been very responsible of my boss but to give her credit I feel she wouldn't done this if dealing with it upset me. If anything it made me feel good to know that I could reach these individuals and have that kind of effect on them). When I downloaded this book via my kindle app I already suspected that I may have some empath qualities but I didn't realize that you could have more than one that kinda fit the bill. Anyway this book is so easy to read and relate to I almost feel like the author and I are having a one on one conversation. I would recommend this book twice over. I started reading this book on Friday 8/31 and started the meditations that night and I've had little things go on that made me kinda stop and "hmmm" but today I had a major occurrence that rocked me this morning (in a bittersweet way) which prompted me to write this review. So, I thank you Ms. Dillard for creating this book and helping those like me that need a little nudge in the right direction.

This main value in this book is that it can direct your attention towards the gifts that you already have. What is important about that, is that from there you can continue to develop your talents into more useful abilities. She writes with a genuine love that makes it possible to trust that she has the best of intentions for you. Her breakdown of the psychic types is very beneficial for self reflection and personal growth.

Good for explaining which intuitive type you are. Gives a few meditation type exercises but seems to repeat the same things over and over.

One of the reasons i purchased this book was to find out the type of intuition i had , and this book does a wonderful job of uncovering it for you and also has tips on how to develop it. One needs to have patience and determination as psychic skills take a time to develop. There is only one point that i think should ve been in the book but its not and that is ; she doesnt mention if other type of meditation practices could be used instead of the ones she suggests in the book, as some of us could already been meditating so it would ve been a nice addition to the book , nevertheless its a well written , honest and very informative book..

This book really blew me away. I was very impressed by the knowledge of the writer. She clearly knows what she is talking about and opened my eyes to my own psychic abilities plus great meditations to develop them further.
