Customer Reviews

excellent to have as a reference to help memorize. saves a load of time trying to write the cards yourself. the cardstock is not bad at all. thin, and not double glossy coated or anything, but feel like a thinner sized business card. same dimensions too. I'm happy with this purchase, and it didn't cost that much. The print was of very good quality, and the terms are quite thorough. as for organization, it's not super organized, but alphabetical. however, mixing and matching cards is the best way to memorize these terms.

The best handy helper in medical school. Even after you take medical terminology, you will continuously hear medical terms and lingo through out school and your career. Even if you're not a student, this will definitively help you out. I still keep them.

Cards were very cheap quality, super thin and not organized well. Better off making your own cards for the price.

this are good but not if you need to know what the word means because there is definition attached to the flash card

Medical terminology is tough and there's been a few word not in the set but I just made one. Helpful

These flash cards were very helpful as I studied for my Medical Term test. I would recommend these.

Helped me a lot when taking Medical Terminology class
