The Hidden Messages In Water

Synopsis

In this New York Times bestseller, internationally renowned Japanese scientist Masaru Emoto shows how the influence of our thoughts, words and feelings on molecules of water can positively impact the earth and our personal health. This book has the potential to profoundly transform your world view. Using high-speed photography, Dr. Masaru Emoto discovered that crystals formed in frozen water reveal changes when specific, concentrated thoughts are directed toward them. He found that water from clear springs and water that has been exposed to loving words shows brilliant, complex, and colorful snowflake patterns. In contrast, polluted water, or water exposed to negative thoughts, forms incomplete, asymmetrical patterns with dull colors. The implications of this research create a new awareness of how we can positively impact the earth and our personal health.

Customer Reviews

The Hidden Messages in Water is magnificent. Through his genius photography and superb scientific skill, Dr. Masaru Emoto has created a book that is truly a mystical treasure. His contribution to research in spiritual consciousness is positively masterful. âCaroline M. Myss, author of Sacred Contracts and Anatomy of the Spirit As with Galileo, Newton, and Einstein, Dr. Emoto's clear vision helps us see ourselves and our universe differently. Science and spirit unite, resulting in a profound and undeniable quantum leap in how we view our world, and how we can reclaim our health and create peace. âMarcus Laux, ND, editor, Naturally Well Today Dr. Emoto's work with water beautifully illustrates the healing power of love and gratitude. These building blocks

of appreciation support our well-being in body, mind, heart, and soul. The Hidden Messages in Water is a most valuable contribution to the creation of a positive future for our world. â "Noelle C. Nelson, PhD, coauthor of The Power of Appreciation

We are very pleased to be able to offer the first book published in the United States of Masaru Emotos work. We are also gratified by the overwhelming reception to this book. We have received calls from people of all backgrounds and interest who are fascinated and inspired by his research with water. Masaru always says in his lectures that he did not have any special training that led to his discovery of what is hidden in water. He says that he is only one small man doing this work--that we all have this potential in us. We hope that his work allows you to see the possibility of what one person can do that can affect the rest of the world. We thank the film makers of "What the Bleep Do We Know?" for spreading the word about Masarus work. Thank you also for your interest in Masaru Emotos work and your support of Independent publishing. --Cynthia Black, President, Beyond Words Publishing --This text refers to an out of print or unavailable edition of this title.

This is a new perspective and a different way of looking at water and the world. Using special equipment and several different techniques the author photographs water crystals that are submitted to external intangible influences or come from different places and origins. The results are surprising and sometimes astounding. I did enjoy this book and was indeed in aw with some of its photos. After reading this book, you will think of water in a different way. You will perhaps realize that water is not just H₂O or a mere chemical bound of different elements but something much bigger than the addition of the parts with a very subtle balance and a specific permanent vibration that is in touch with whatever surrounds it. Something so sensitive that can be influenced by human emotions and messages and because of that sensitivity becomes extremely fragile and able to show you images of desolation or happiness, apathy or joy, depending on the way you deal with it.

this is so informative and amazing information I have been actually buying the bottled water from Firefly within a foundation that created the bottles and once you buy them, you use them and refill them every day. amazing book with so much information

We learned about this book from YouTuber, King of Random - Grant Thompson. I started reading it the other day and I am blown away. I love the research that this author put into his work and love to read about his discoveries. I don't know what else to say about it. I just love the book so far and I

am about half way through it in one day. Great book!

LOVE this book! It arrived promptly and I read it in a day or 2! It is a definite re-read!

One of my favorite books.. I continue to give this book as a gift. I think I have purchased probably 20 of them.

This book is so needed. This should be required reading for the human race.

No problems, thanks

Lovely!
