Customer Reviews

Terry Des Jardins, M.Ed, RRT is Professor Emeritus in the Department of Respiratory Care at Parkland College in Champaign, IL where he taught for 35 years. He still actively lectures third year medical students on clinical manifestations and assessment of respiratory disease and cardiopulmonary physiology at the University of Illinois College of Medicine at UrbanChampaign.

this work book was a very useful tool to to book. It was very helpful and went right along with the book. I would reccomend buying this to use with your book.

The textbook that goes with this workbook is fabulous, but the workbook really didn't help me that much. However, it was required by my program.

The workbook is very basic. My coure was much more on physiology and this seemed to be more anatomy. I did okay in the course so I guess it helped in the long run.

Took one month to receive the wrong edition of this book.Seller helpful and presumably not at fault.Be sure to view edition status before ordering.Especially when product is not pictured.
