## Customer Reviews

The Dubrows present a refreshing, less-is-more perspective on maintaining a youthful appearance and have crafted a solid information resource. A useful, accessible primer for readers hoping to keep themselves looking their best. • Kirkus Reviews Heather and Terry are the ideal combination of scientist/surgeon and expert consumer. In this book they've combined the best of both, in true Dr. and Mrs. Guinea Pig fashion, to give you the

most cutting-edge and accurate assessment of the most potent products and treatments on the market today— from the sublime to the pure snake oil. Their inimitable voices, humor, love for each other, and willingness to poke fun at their own foibles in order to save you money and turn back the clock infuses every page of this book. I hope you'll enjoy it as I have.   
Dr. Mehmet Oz : "This book is really quite good. Heather and Terry repeatedly remind the reader not to give in to hype but rather to be informed (and look for the grey hair! - I love that advice). And with their encyclopedic survey, the reader will be just that. They offer solid information founded in good science and extensive clinical experience."   
Dr. Drew Pinsky : Dr. Terry Dubrow and his guinea pig wife, Heather Dubrow, have written the absolute clearest and best guide to help anyone who is interested in the state of the art anti-aging treatments currently available on the market, both conventional and unconventional. This book is informative as well as entertaining and should be considered a modern day bible of anti-aging. -Dr. Paul Nassif

It was informative and a fun read. I would recommend it.

Excellent book well written with Amazing tips on beauty products and procedures for all budgets. thumbs up

Good!

Very good information. Easy to read and understand.

Great book. Very detailed. It had everything you wanted to know about skin, hair and the face.

Ok but not as informative as I expected but then it did keep me from considering a couple bogus procedures

I enjoyed this as an audio book and then ordered the hardback for referencing.

I loved this book because they thoroughly explain everything from products to procedures and it is not some long wordy advertisement for their products. This is a legitimate handbook on the products and treatments available for skincare. They suggest real products that we average consumers can and do purchase (not Hollywood starlets who have had \$30,000 worth of facelifts before endorsing an eye cream). I also know that they are trained professionals who have medical understanding and can cut thru the marketing fluff and tell you what works and what is bogus. I have gone back several times and looked up verbiage. Great book. I hope they plan to update it as new technologies and products come out.
