Study Guide For Lippincott Williams & Wilkins' Comprehensive Medical Assisting

Synopsis

Master your course with the practice and hands-on-activities that will help you get ready for the medical office. In this new edition of *Study Guide for Lippincott Williams & Wilkins' Comprehensive Medical Assisting*, the exercises and activities align with the most current Medical Assisting Education Review Board (MAERB) of the American Association of Medical Assistants (AAMA) curriculum standards. The Study Guide is divided into sections that coincide with the textbook and includes exercises that reinforce the knowledge and skills required of all Medical Assistants. Take advantage of the following when you add this guide as a study tool:

- **Practice Questions in a Variety of Formats** – No matter your learning style, you can reinforce your learning and get ready for course success. These formats will help you retain new information, reinforce previously learned content, and build confidence.
- **Case Studies for Critical Thinking** – These scenarios and questions are designed with real-world situations in mind and are intended to promote conversation about possible responses, not just one correct answer! In short, these studies can help you get ready for what you will face in the real world.
- **Procedure Skill Sheets** – Every procedure in the textbook has a procedure skill sheet in the Study Guide to help you practice and evaluate your learning.

Customer Reviews

It arrived right on time. This Study Guide is really good and has all the required exercises and practices that are related to the new edition's book.

Good to have online when I need it. The study guide is great to have also, it is a good combo.

The book was very knowledgeable and helpful with quizzes and homework

Does the study guide come with this

Came with the access code I needed, the soft cover gets worn easily but that is to be expected.

Perfect conditionLWW didn't correct much from the older edition plus there were some new errors in printing.
