The Scholarship System: 6 Simple Steps On How To Win College Scholarships And Secure Financial Aid

Synopsis

www.thescholarshipssystem.com Interested in learning how to get paid to go to college? From freshman year in high school to your senior year in COLLEGE, applying for scholarships can get you a ton of money to help pay for college. Even better, you can go to college for FREE. The challenge is that applying for scholarships takes a significant amount of time and requires you to understand all the complex pieces of the process. Is it really possible to get a FREE RIDE to college by applying for scholarships? Can you really graduate with ZERO DEBT? The answer is **YES!** Anyone can win a scholarship and The Scholarship System provides you with 6 easy yet effective steps on how to make that happen. Whether you are a freshman in high school, a junior in college or even a graduate student, The Scholarship System is what you need. With proven strategies, examples and testimonies, The Scholarship System gives you a system to make the scholarship process as easy and painless as possible regardless of your age, GPA, financial situation, or family background. This short book provides you with a step-by-step guide that you can actually implement in fewer hours than a part-time job yet realize the benefits for more than four years later. With these same tactics, Jocelyn Paonita managed to bring in over \$125,000 in scholarships and financial aid, paying her entire college bill and giving her extra cash each semester. She was able to focus on her higher education rather than constantly worrying about money and how much student loan debt was piling up. With *The Scholarship System: 6 Simple Steps on How to Win College Scholarships and Financial Aid*, you can do the same thing too! This guide will provide you with simple solutions for applying for scholarships so that you can save time and effort while increasing your rate of return. It will discuss where you can find scholarships that barely anyone else knows about, therefore increasing your chances of winning. The short book will also boost your chances by covering a fast way to write an award-winning essay that can be perfected and easily reused for other applications. And best of all, you will have access to tips and tricks on how you can catch scholarship judges' attention in a good way and make sure your application doesn't get thrown in the trash. Lastly, you will receive over 15 tools and resources so that, by the time you complete reading this book, you will be well on your way to getting your college experience paid for. So what are you waiting for? Don't wait any longer. Start building your college scholarships and financial aid now! "The book you now hold in your hands is one of the greatest (and simplest) guides I have ever seen to master the scholarship process." - Adam Carroll, CEO at National Financial Educators

Customer Reviews

I think one of my favorite parts about the book is the free audio book addition. Lately I've been doing a lot of driving so it is nice to listen to these self help how to guides while I drive. Definitely makes me feel like I am taking advantage of my time, so props to the author on supplying the audio book for free. On to the actual book: It is a brief 70 pages or so. Which is typically a good sign to me. Anytime I download a self help book, I am looking for clear concise content. Any self help book that is several

hundreds of pages long, is typically filled with fluff and non useful information. The book is broken into the following 6 steps

Step 1: Getting in the money making mindset This section features some content that I've seen in other books before, but the purpose of providing this content has a definite purpose and enriches the rest of the book.

Step 2: Understanding College Financial Aid 101 This section is HUGE for High School Seniors about to go into College, Parents sending a child to college for the first time, or anyone who has not waded through the financial aid process themselves. The content in this section is available elsewhere online, but not all in one place, and not in such a clear and concise format.

Step 3: The Hunt is On: Finding Scholarships That Have Little Competition Yet Can Fund Your Free Ride In this section we encounter brand new content straight from the source. The \$5 value is covered in this section tenfold.

Step 4: Heat Up Your Application - Successful Strategies on Becoming a Competitive Candidate At first glance this seemed a bit of common sense to me. As I was reading I caught myself. I definitely did not think about these strategies when I was still in college, and I know I definitely would not have thought of them while still in High School. It was at this point in the book that I found myself aligning with a lot of the other reviewers in feeling the "I wish I'd known this way back when" feeling. Nostalgia hit me hard, and I can really see how this book could benefit students.

Step 5: Crushing Scholarship Applications one at a time Choosing Your Process To a High School or College student, procrastination runs rampant. One of the only ways to get teenagers to work through applications like this is to give them very concise instructions. This section accomplishes that, I believe.

Step 6: You've Won The Money: Closing the Deal So More Money Comes Your Way This section touches on two very key lessons in life: showing gratitude, and paying taxes. There is still nothing that beats a quality Thank You letter, so I was pleased to see this taught as common practice. The taxes section would also be quite useful to students, as taxes are not something many are accustomed to thinking about at their current stage of life.

In closing: This is a short, informative, and pleasant read that would have greatly benefited me were I still in college. I look forward to seeing some success stories this book will undoubtedly create. I gave Jocelyn my email address in exchange for the free audio book, so I have no doubts in my mind that I will be informed when the success stories start rolling in!

Note: I did not touch on the action guide in this review because I did not use the action guide.

Encouraging story. It is more of a motivator than an actual guide; at least that how my son felt after reading it. I wanted him to have a different perspective than just mine on how to be doing his research. It was a quick read and it was helpful. Nothing earth-shattering but every little bit helps.

Jocelyn knows what she's talking about because she's lived it. But she also relays strategies that are easy to understand for parents AND students. We're using this with our 10th grader and our 8th grader is already thinking about how he can start this process early! Thanks for a great resource!

Good information for a beginner and an easy read. But nothing amazing or a new discovery. It's a good starting point.

There are a number of ways to gain scholarship money. Many of the authors suggestion are common sense and if a student does not have a great deal of parental guidance -it is a good place to start. The book was worth \$5. Nothing new here.

useful book for a granddaughter preparing for college admission

Good book on learning how to qualify for scholarships. Really an effective system that most young people can use to win money for college. Highly recommended five stars

Very disappointed. It's hyped to tell you where to find scholarships. What a waste of money. Let me ruin the end for you, use a book of scholarships or goggle, that is what she said. Not helpful at all. Nothing new here.
