Customer Reviews

I'm a nurse and a current nursing student. I'm also a visual learner. I received a mailing from Lippincott to try the new version of this book. The pictures and information they had in their advertising had me really interested in getting one. I balked at the price tag on it though and had the idea of checking the price on . I found this older edition for really cheap. I am really happy with the book because it helps me to see what is going on in the body with various disease products and that is useful to me as a visual learner.

This Book is Sooo Nice!! I could believe it...I'm a nursing student and I was required to take Patho.

I've realized that you can understand a lot more..if you start with the patho. This book breaks it down nicely...it even has pictures that go into detail, with the signs and symptoms...I love it!! The best part about is ...defintely the price...I bought a used one and I think I may have paid about five dollars...It was a GREAT Buy!!!

I love this book. This book is easy to understand.

The meat and potatoes of every disease process! You will get an A!

I think other paths text books would be better but I like the pictures and break down. It just seems limited

excellent seller very good book

I LOVE this book. Just as the first reviewer, I WISH I had had this book from Semester One of my college career. Beautiful, clear illustrations. Organized, easy to understand text. I'm thrilled to have this book. It's a 'Keeper.'

A great book, and a no problem transaction.
