Amphibians & Reptiles Of Indiana, Revised Second Edition

Synopsis

This extensively revised second edition is one of the best state treatments for herps, by one of the foremost authorities. The shaded range maps make it a useful reference for eastern North America.

Language: English

ISBN-10: 1883362105

ISBN-13: 978-1883362102

Product Dimensions: 6 x 1.5 x 9 inches

Shipping Weight: 2.8 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #482,589 in Books (See Top 100 in Books) #13 in Books > Science & Math > Biological Sciences > Zoology > Amphibians #31 in Books > Science & Math > Biological Sciences > Zoology > Reptiles #107 in Books > Science & Math > Biological Sciences > Animals > Reptiles & Amphibians

Customer Reviews

Sherman A. Minton, Jr. (1919-1999), was a native of southern Indiana and attended Indiana University in Bloomington where he earned a degree in zoology. A longtime member of the Indiana University School of Medicine, he was an expert in the study of venomous reptiles and the toxicology of venom.

I'm originally from Indiana so picked up this book to get a fairly complete list of native species. This is a great reference for anyone who enjoys herping within the state. I have found at least one species that was listed as possibly existing in Indiana, and I think there are some species that have dwindled due to the affects of farming and factories on local streams, etc. Unfortunately most of the state except for the southern part is farm land and farmers are more interested in making a buck than protecting the environment which has had an adverse affect on wildlife. I think the southern part of Indiana will remain more accurate with this book as time progresses than the remainder of the state.

Dr. Minton's 2001 full-color update of his landmark 1972 "Amphibians and Reptiles of Indiana," is

excellent. Not only does it contain 25+ years of extra data from many other sources in the meantime, it also shows in the color photos the exact identity of the various species, if that can ever be done completely. For anyone who is interested in any branch of herpetology, biology, zoology and especially for those who have searched for or studied any of the Indiana species and habitats, this book is for you as a "must-see" guide. Dr. Minton was a major help to me in my two federally-and-state-funded range-wide surveys of the Kirtland's and the copperbelly water snakes. He will be and is much admired and missed as a major contributor to Indiana's Natural Heritage. R.I.P., Dear Sherman. Mark Ashley Sellers Jr
