Patient -vs- Doctor: Misdiagnosis

Synopsis

In the U.S. approximately 12 million adults who seek outpatient medical care are misdiagnosed each year; this breaks down to 1 in 20 adults. Of those misdiagnosis mistakes roughly 6 million could cause harm and at times death. Patients with conditions such as heart failure, pneumonia, depression, cancer and other health-related issues could have serious problems that remain unrecognized. Unfortunately, a youthful appeal can lead to delayed diagnosis, failure to diagnosis, lack of competent care; ultimately a misdiagnosis. In his book entitled *Misdiagnosis: A Patient vs. Doctor*, Retired Lt. Garry L. Jones teaches patients how to prevent delayed or misdiagnosis. After suffering years of recurring infections Jones eventually learned the root cause of his suffering - prostate cancer.

Customer Reviews

I enjoyed reading about Garry's journey to a diagnosis and a healthy recovery. He has a way of speaking truth with a bit of humour! I have had the pleasure of reading his previous books and am grateful that he has chosen to share all of his experiences through his writing. Well done!
